14, He went to a seaside resort because he was.....on water skiing.

15, Here the notebook and report I promised you last week.

Section 2: Read the following passages and do the tasks given.

Passage 1: Read the passage and answer the questions.

An elevator is wonderful. It is really only a small room. Rooms usually stay in one place. Elevators travel up and down all day long.

Sometimes a worker stands in the elevator to run it. In modern elevators there is no worker. The people walk in. They know what floor they want. They press a button and the elevator goes to that floor. It is all very fast and easy.

Elevators are very important to us. Why? Think about a tall building. Maybe it has twenty floors. Maybe it has fifty or more. Who can walk up all those stairs. Maybe people can climb them one time. Can someone climb thirty floors to an office everyday? Can small children walk up to their apartments on the twenty- fourth floor? Can their mother and father carry food up all those stairs? Of course not.

We can have high buildings because we have elevators. They are really wonderful.

1, What is an elevator really?

.....

2, How is an elevator different from other rooms?

.....

3, How do people make an elevator go up and down?

.....

4, Can people walk up twenty or forty floors everyday?

.....

5, Why can we have high buildings?

.....

Passage 2: Read the passage carefully and choose ONE which you think fits best.

Thomas Edison was born in Milan, Ohio, in 1847. His family moved to Port Huron, Michigan, when he was seven. Surprisingly he attended school for only two months. His mother, a former teacher, taught him a few things, but Thomas was mostly **self-educated**. His natural curiosity led him to start experimenting at a young age.

Thomas Edison lit up the world with his invention of the electric light. He also invented the record player, the motion picture camera, and over 1,200 other things. He worked 16 hours a day and sometimes he worked so intensely that his wife had to remind him to sleep and eat.
